WORK EXPERIENCE

Salesperson My Family's Store

2018 - Present

Lashio, Shan

It is a family business store that we sell from plastic material(eg. plastic boxes) to shirts and blankets etc.

Achievements/Tasks

- I work as a salesperson and also mini-lorry driver to pick-up goods from the warehouse and deliver to the store.

PERSONAL PROJECTS

1. My Portfolio

- This is my personal Portfolio that I build using React js.
- **View on Live Site** - <https://saipepu.github.io/pepu-portfolio>

2. Cooking Recipes App

- It is a react app where you can find food recipes based on the country you can choose that provide in the category.
- **View on Live Site** - <https://saipepu.github.io/food-recipes-app>

3. Productivity App

- It is a simple productivity App which I built using React js and redux.
- You can add the Tasks you need to complete and the Projects that you are working on.
- **View on Live Site** - <https://saipepu.github.io/productivity-app>

4. E-commerce site

- An e-commerce site that I made with React js and redux-thunk with the fakestore API.
- You can read the item detail when you click on them and you can choose your items and add them to your cart.
- **View on Live Site** - <https://saipepu.github.io/ecommerce-site-v2>

5. Movie Searching App

- It is a movie searching app that I created with OMDB api using react and redux-thunk.
- You can search literally every movies in the world by name. It will navigate you to the movie's plot page when you click on them.
- **View on Live** - <https://saipepu.github.io/movie-app-react>

6. Weather App

- A weather forecasting app. It tells you about the weather condition of the city that you enter. I built this with react and also moment.js using openweathermap API.
- **View on Live** - <https://saipepu.github.io/weather-app-react>
